Hiring Manager  
Dear Hiring Manager,

I am writing to express my interest in the Senior Front-End Engineer position at [Company Name]. With over 10 years of experience building and scaling Angular-based web applications in product-driven environments, I bring a strong track record of delivering maintainable, high-performance systems while mentoring teams and driving technical ownership.

In my most recent role at Beed Education Adventures, I owned the front-end architecture for an online education platform, modernized three legacy Angular applications (v7 → v20), and co-developed an internal video editor using React and Next.js, eliminating recurring third-party licensing costs. I consistently balance delivery speed with long-term maintainability, making pragmatic architectural trade-offs and guiding teams toward clean, production-ready code.

Beyond technical implementation, I act as a trusted advisor for UI/UX decisions, collaborate closely with product and backend teams, and mentor engineers through code reviews and architectural guidance. My work has directly led to reduced bundle sizes, stabilized releases, and measurable business impact, earning recognition as a top-performing engineer within six months.

I am excited about the opportunity to bring this combination of technical depth, architectural expertise, and pragmatic decision-making to [Company Name]. I am confident that my experience delivering scalable front-end solutions and leading modernization efforts aligns perfectly with your team's goals.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to the continued success of your front-end initiatives.

Sincerely,  
Aliakbar Esmaeili
