Cover Letter

Hello,

Thank you for sharing the details of your project. I'm excited about the opportunity, as it aligns perfectly with my expertise as a Senior Front-End and Full-Stack Developer with over 9 years of experience. Throughout my career, I have delivered scalable, secure, and high-performing solutions across ERP, financial, and education platforms.

Here's what I can offer:

- Extensive Expertise: 9+ years of experience solving complex challenges across diverse industries.

- Angular, React, and Node.js Proficiency: Skilled in all Angular versions (2016–2024), React, and Node.js to build modern, robust applications.

- Large-Scale Project Experience: Proven success in handling ERP and education platforms with high transaction volumes.

- Clean, Secure, and Reusable Code: I prioritize writing modular, maintainable, and secure code following best practices in TypeScript, JavaScript, HTML, and CSS.

- Reliable Communication: Clear and consistent updates with 24/7 reliability.

- Commitment to Success: Dedicated to creating long-term value and ensuring project scalability.

I'd be happy to schedule a short 10-minute introduction call to learn more about your requirements and confirm how I can contribute. I'm available tomorrow between 10 AM – 1 PM EDT or after 3 PM EDT. If those times aren't convenient, please share your availability and I'll adjust accordingly.

Questions I'd like to discuss with you:

- What are the main pain points related to customer complaints?

- Do you currently have separate environments for production, development, and testing?

I'm confident my expertise can add real value to your project, and I look forward to discussing how I can support its success.

Best regards,

Aliakbar Esmaeili
